### **About Acumen Pharmaceuticals, Inc.**

Acumen, headquartered in Charlottesville, VA, with additional offices in Newton, MA and Indianapolis, IN, is a clinical-stage biopharmaceutical company developing a novel therapeutic that targets toxic soluble amyloid beta oligomers (A $\beta$ Os) for the treatment of Alzheimer's disease (AD). Acumen's scientific founders pioneered research on A $\beta$ Os, which a growing body of evidence indicates are early and persistent triggers of Alzheimer's disease pathology. Acumen is currently focused on advancing its investigational product candidate, ACU193, a humanized monoclonal antibody that selectively targets toxic soluble A $\beta$ Os, following positive topline results in INTERCEPT-AD, a Phase 1 clinical trial involving early Alzheimer's disease patients.
