

Acumen Pharmaceuticals Reports Third Quarter 2023 Financial Results and Business Highlights

November 13, 2023

- Initiation of a Phase 2 study, ALTITUDE-AD, to investigate ACU193 for the treatment of early Alzheimer's disease expected in the first half of 2024, following positive FDA interaction in October 2023
- Announced global collaboration and license agreement with Halozyme for development of a subcutaneous formulation of ACU193
 - Initiation of a Phase 1 study to support a subcutaneous dosing option of ACU193 expected in mid-2024
- Announced a credit facility of up to \$50 million from K2 HealthVentures, to provide capital to support subcutaneous clinical work and general corporate purposes
- CSF biomarker data observed in the Phase 1 INTERCEPT-AD trial support pharmacology of ACU193 and role of amyloid beta oligomers in Alzheimer's disease
- Cash, cash equivalents and marketable securities of \$282.7 million as of Sept. 30, 2023, expected to support current clinical and operational activities into the second half of 2026
- Company to host conference call and webcast today at 8:00 a.m. ET

CHARLOTTESVILLE, Va., Nov. 13, 2023 (GLOBE NEWSWIRE) -- [Acumen Pharmaceuticals, Inc.](#) (NASDAQ: ABOS) ("Acumen" or the "Company"), a clinical-stage biopharmaceutical company developing a novel therapeutic that targets toxic soluble amyloid beta oligomers (A β Os) for the treatment of Alzheimer's disease (AD), today reported financial results for the third quarter of 2023 and provided a business update.

"My excitement for Acumen's future is centered on the strength of our ACU193 development strategy for the treatment of early Alzheimer's disease, and the deep expertise of our team to execute on that strategy. We continue to make significant operational, regulatory and strategic progress. Following our positive Phase 1 data in the third quarter, we recently had a positive interaction with the FDA and plan to initiate a Phase 2 study in the first half of 2024. On a strategic front, I am excited about our recent collaboration and licensing agreement with Halozyme for the development of a subcutaneous formulation of ACU193, to broaden potential treatment optionality and increase convenience for patients. To help finance this important workstream, we are pleased to announce today that we have entered into an agreement with K2 HealthVentures for a debt facility of up to \$50 million," said Daniel O'Connell, President and Chief Executive Officer of Acumen. "We have also observed encouraging trends in CSF biomarker data from our Phase 1 study, further solidifying the pharmacology of ACU193. Our talented team is committed to pursuing the full potential of targeting amyloid beta oligomers for this patient population, and I am proud of our progress as we continue to execute at the highest level and work to generate strong and sustainable value, today and into the future."

Recent Highlights and Anticipated Milestones

ACU193 Clinical Development

- **In October 2023, the Company presented additional detail from first-in-human Phase 1 study of ACU193 for early AD at the Clinical Trials on Alzheimer's Disease (CTAD) conference.**
 - Announced dose selection of 50 mg/kg and 35 mg/kg every 4 weeks for ACU193 treatment arms in upcoming placebo-controlled Phase 2 trial based on significant target engagement of A β Os approaching maximal effect.
 - Presented data exploring target engagement modeling of ACU193 to inform dose selection, plus further analyses of dose-related amyloid plaque reduction and clinical characteristics of ARIA-E, confirming proof-of-mechanism for ACU193.
- **In October 2023, the Company met with the FDA to discuss the next clinical trial in the development program for ACU193.**
 - The agency indicated they are aligned in principle with the Phase 2/3 study design.
 - In the first half of 2024, the Company expects to initiate a Phase 2 study, ALTITUDE-AD, as the next phase of development for ACU193.
- **Today, the Company announced encouraging results from INTERCEPT-AD Phase 1 cerebrospinal fluid (CSF) biomarker data, further supporting the pharmacologic activity of ACU193.**
 - Observed dose dependent trend in the multiple ascending dose cohorts on CSF levels of p-tau181, total tau, neurogranin and A β 42/40 ratio.
 - P-tau181 (p=0.049) and neurogranin (p=0.037) showed statistically significant improvement at 60 mg/kg Q4W as compared to the placebo group after three administrations of ACU193.

- Nominally significant correlation between target engagement of A β Os and change in neurogranin observed across all doses.
- Trend between target engagement of A β Os and change in p-tau181 observed across all doses.
- Plasma biomarker analysis in progress.

"We have observed a dose-dependent trend toward drug effect of ACU193 on CSF levels of p-tau181, total tau, neurogranin and the A β 42/40 ratio after only three administrations. The fact that we are observing changes in CSF biomarkers is highly supportive of ACU193's downstream pharmacology as determined in our Phase 1 study," said Eric Siemers, Chief Medical Officer of Acumen. "Changes in neurogranin and p-tau181 were statistically significant at the highest dose level studied, and correlated with target engagement of A β Os, consistent with the mechanism of action of ACU193. These data increase our confidence that ACU193 has potential for the treatment of early Alzheimer's disease, which we will investigate in our Phase 2 study that is expected to initiate in the first half of 2024."

Corporate Updates

- **In November 2023, announced a global collaboration and licensing agreement with Halozyme for the development of a subcutaneous formulation of ACU193, to potentially offer additional flexibility and convenience for patients and caregivers.**
 - Expect to initiate a Phase 1 trial investigating a subcutaneous dosing option of ACU193 in mid-2024.
- **Today, announced a credit facility for up to \$50 million provided by K2 HealthVentures, for capital to support subcutaneous clinical work as well as general corporate purposes.**

Third Quarter 2023 Financial Results

- **Cash Balance.** As of September 30, 2023, cash, cash equivalents and marketable securities totaled \$282.7 million, compared to cash, cash equivalents and marketable securities of \$172.2 million as of June 30, 2023. This increase is due to the net proceeds from the Company's public offering of approximately \$122 million on July 21, 2023. Altogether, this runway is expected to be sufficient to support current clinical and operational activities into the second half of 2026.
- **Research and Development (R&D) Expenses.** R&D expenses were \$11.2 million for the three-month period ended September 30, 2023, compared to \$8.3 million for the three-month period ended September 30, 2022. The increase in R&D expenses was primarily due to increased costs related to materials, consulting, personnel and other costs.
- **General and Administrative (G&A) Expenses.** G&A expenses were \$4.9 million for the three-month period ended September 30, 2023, compared to \$3.1 million for the three-month period ended September 30, 2022. The increase in G&A expenses was primarily due to increased costs related to personnel, consulting and legal/patent services.
- **Loss from Operations.** Losses from operations were \$16.0 million for the three-month period ended September 30, 2023, compared to \$11.4 million for the three-month period ended September 30, 2022. This increase was due to the increased R&D and G&A expenses over the prior year period.
- **Net Loss.** Net loss was \$13.0 million for the three-month period ended September 30, 2023, compared to \$10.7 million for the three-month period ended September 30, 2022.

Conference Call Details

Acumen will host a conference call and live audio webcast today, Nov. 13, 2023, at 8:00 a.m. ET.

To participate in the live conference call, please register using this [link](#). After registration, you will be informed of the dial-in numbers including PIN. Please register at least one day in advance.

The webcast audio will be available via this [link](#).

An archived version of the webcast will be available for at least 30 days in the Investors section of the Company's website at www.acumenpharm.com.

About ACU193

ACU193 is a humanized monoclonal antibody (mAb) discovered and developed based on its selectivity for soluble A β Os, which Acumen believes are the most toxic and pathogenic form of A β , relative to A β monomers and amyloid plaques. Soluble A β Os have been observed to be potent neurotoxins that bind to neurons, inhibit synaptic function and induce neurodegeneration. By selectively targeting toxic soluble A β Os, ACU193 aims to directly address a growing body of evidence indicating that soluble A β Os are a primary underlying cause of the neurodegenerative process in Alzheimer's disease. ACU193 has been granted Fast Track designation for the treatment of early Alzheimer's disease by the U.S. Food and Drug Administration.

About INTERCEPT-AD

INTERCEPT-AD was a Phase 1, U.S.-based, multi-center, randomized, double-blind, placebo-controlled clinical trial evaluating the safety and tolerability, and establishing clinical proof of mechanism, of ACU193 in patients with early Alzheimer's disease (AD). Sixty-five individuals with early AD (mild cognitive impairment or mild dementia due to AD) enrolled in this first-in-human study of ACU193. The INTERCEPT-AD study consisted of single-ascending-dose (SAD) and multiple-ascending-dose (MAD) cohorts and was designed to evaluate the safety, tolerability, pharmacokinetics (PK), and target engagement of intravenous doses of ACU193. More information can be found on www.clinicaltrials.gov, NCT identifier NCT04931459.

About Acumen Pharmaceuticals, Inc.

Acumen, headquartered in Charlottesville, VA, with offices in Indianapolis, IN, and Newton, MA, is a clinical-stage biopharmaceutical company developing a novel therapeutic that targets toxic soluble amyloid beta oligomers (A β Os) for the treatment of Alzheimer's disease (AD). Acumen's scientific founders pioneered research on A β Os, which a growing body of evidence indicates are early and persistent triggers of Alzheimer's disease pathology. Acumen is currently focused on advancing its investigational product candidate, ACU193, a humanized monoclonal antibody that selectively targets toxic soluble A β Os, following positive topline results in INTERCEPT-AD, a Phase 1 clinical trial involving early Alzheimer's disease patients. For more information, visit www.acumenpharm.com.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. Any statement describing Acumen's goals, expectations, financial or other projections, intentions or beliefs is a forward-looking statement and should be considered an at-risk statement. Words such as "believes," "expects," "anticipates," "could," "should," "would," "seeks," "aims," "plans," "potential," "will," "milestone" and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. Forward-looking statements include statements concerning Acumen's business, and Acumen's ability to achieve its strategic and financial goals, including its projected use of cash, cash equivalents and marketable securities and the expected sufficiency of its cash resources into the second half of 2026, the therapeutic potential of Acumen's product candidate, ACU193, including against other antibodies, the anticipated timeline for initiating a Phase 2 clinical trial of ACU193 and a Phase 1 trial to support a subcutaneous dosing option of ACU 193, and the expected use of proceeds from a credit facility. These statements are based upon the current beliefs and expectations of Acumen management, and are subject to certain factors, risks and uncertainties, particularly those inherent in the process of discovering, developing and commercializing safe and effective human therapeutics. Such risks may be amplified by the impacts of geopolitical events and macroeconomic conditions, such as rising inflation and interest rates, supply disruptions and uncertainty of credit and financial markets. These and other risks concerning Acumen's programs are described in additional detail in Acumen's filings with the Securities and Exchange Commission ("SEC"), including in Acumen's most recent Annual Report on Form 10-K, and in subsequent filings with the SEC. Copies of these and other documents are available from Acumen. Additional information will be made available in other filings that Acumen makes from time to time with the SEC. These forward-looking statements speak only as of the date hereof, and Acumen expressly disclaims any obligation to update or revise any forward-looking statement, except as otherwise required by law, whether, as a result of new information, future events or otherwise.
